

Fork?

Figure 1: Fork

You have to choose your learning path for the next months, try to do the two exercises!

Web Developer: Wordpress Integrator

Keywords: *System administration, Wordpress (Creating themes and plugins), Wireframing, WebDesign, Project management, Ecommerce*

Locally

- Download Wordpress: <https://wordpress.org/>
- Make it work your computer with your local MySQL database.
- Install a nice theme, add custom content.

Remotely (Bonus)

- Create an account on <https://wordpress.com/>

- Activate the JetPack plugin <https://jetpack.com/> and connect <http://oli.simplon.co/> with the Wordpress app <https://developer.wordpress.com/calypso/>

You must have a functional website on your computer to do this Fork!

Web Developer: Advanced PHP

Keywords: *Algorithms, POO (UML), Symphony (MVC), Deployment, Tests, Security*

Validate the most challenges possible to prove that you understand algorithms and object-oriented programming: <https://github.com/simplonco/php-challenges/>

You must validate at least 3 exercises to do this Fork!
